

Portfolio Internet Site Project

Stage 2 (15%)

Now that the planning stage has been completed, you may now begin to build the fully functioning framework of the site. This stage will require the final colour schemes, backgrounds, and the buttons you will be using for the final product. All pages must be created and all links must be working. It is strongly recommended that you sketch out the final layout along with all the filenames. You may be asked for this sketch/plan.

The following pages must be present:

- Enter/welcome page (link to HTML site) "index.html"
- Starting page for the html site
- Contact page
- About – Mission Statement
- Links to pages that are related to your artwork.
- Portfolio page, including an area for Illustrator, Photoshop, Flash, other works
- Any other pages that you will be using, resume, etc.

Once this is complete you must show your teacher.

Due: Friday April 15th
